PLEASE RETURN TO
OFFICE OF THE SECRETARY

Chief, Procurement Division, OL

30 April 1956

Chief, Engineering Division, OC

RECEIVED 230

ENG-6-470

Request for Bids, AS-3

Project - RD 122

25X1

1. This Office has a continuing requirement for miniaturized, lightweight radio systems which permit operation by persons who have relatively little training. The present state of electronic art indicates that such a system is feasible. Specification No. 56-A-1046-A and Test Specification No. 56-A-1046-A-T, of which six each copies are attached, describe the system desired.

2. It is requested that firms capable of producing equipment according to these specifications be contacted and requested to submit bids. Such a listing of firms shall include, but not necessarily be restricted to, the following:

25X1

Informal discussions have been held with representatives of [redacted] who have indicated interest in this project. It is further requested that the estimates be based on the production of 2, 5, and 10 each prototype models. Attachment A describes the Deliverable Items and other services requested for such a system.

25X1

25X1

3. The association of this Agency with these companies shall be classified **SECRET**. The project engineer assigned to this task is [redacted]. Upon our approval of a proposal, we will forward a requisition citing FY 1956 funds.
